

Use of Cookies: Cookies are information that some websites retain for research purposes. Such information includes IP address, browser type, language, date and time, location, site use and the amount of time spent on a particular page, among others. This information is automatically generated and may be combined with user information. This site uses cookies for the following purposes:

Authentication: We use cookies to identify user trends, such as areas of navigation on the website and regional or state user location.

Analysis: We use Matomo Analytics to collect and analyze information about use of our services and report on activities and trends. This service may also collect information regarding the use of other websites, apps, and online resources. You can learn about Matomo's practices by visiting matomo.org/privacy/.

The use of cookies has become a standard for company websites. Most browsers accept cookies. You can independently set your browser to refuse cookies or indicate when a cookie is being sent. If you refuse cookies, you may not be able to use some of the functionality of the site. The site's partners may also use cookies in connection with the services and websites to which the site links. We do not control these cookies.
